

GLOUCESTER COUNTY COMMUNITY DEVELOPMENT BLOCK GRANT PROJECT APPLICATION AND INSTRUCTIONS

Prepared by:
Gloucester County Planning Department
Housing & Community Development
856-307-6650

APPLICATION CHECKLIST

- Read all enclosed documents and understand CDBG's and HUD rules and regulations. (Exhibit A)
- Complete pages 7-13 of application
- Mark Project location on Census Map (Exhibit C) – Project location must be clearly identified on a map.
- Four or more digital quality photographs of the proposed site (Pictures of the completed project will be required). Should be attached as separate Exhibit to application. (hard copies please)
- Attach and properly identify pages used for additional information.
- Copies of all permits (if applicable)
- Approved Resolution
- Signed and dated Certification and Official Authorization (page 7 &13)
- Formal letter from Mayor/Executive Director acknowledging the application for assistance
- Funding Commitments as applicable (Attach letters / commitments)

**Please Send Completed Application To:
Gloucester County Planning Department
Housing and Community Development
1200 North Delsea Drive
Clayton, NJ 08312
ATTN: Christina Velázquez**

**GLOUCESTER COUNTY
COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM
APPLICATION AND INSTRUCTIONAL GUIDE**

I. INTRODUCTION

The purpose of this guide is to provide sufficient detail for the development of a successful proposal for potential municipal applicants for funding through Gloucester County Community Development Block Grant Program. Eligible applicants are participating units of local governmental that are part of the County Consortium. Municipalities wishing to submit an application to the County must first adopt a Resolution authorizing submission of the application and identifying the proposed activity.

In addition, all applicants are required by HUD to have a D-U-N-S number. The D&B D-U-N-S Number is a unique nine-digit identification sequence, which provides unique identifiers of single business entities, while linking corporate family structures together. The D-U-N-S® Number is widely used by both commercial and federal entities and was adopted as the standard business identifier for federal electronic commerce in October 1994. **The D-U-N-S Number® was also incorporated into the Federal Acquisition Regulation (FAR) in April 1998 as the Federal Government's contractor identification code for all procurement-related activities.** D-U-N-S Number assignment is FREE for all businesses required to register with the US Federal government for contracts or grants. To obtain a free DUNS number go to the following link:

<http://fedgov.dnb.com/webform/displayHomePage.do;jsessionid=FD870483927F21B2A709C88F3E7977E9>

The application process is a competitive process and funds will be awarded based on criteria set forth below. This application package provides information on the types of eligible activities as well as the process for application submission. The funding Program Year begins on September 1 and ends on August 31 of the following year.

Applicants should consider this guide as a supplement to the Community Development Block Grant Program Entitlement Grant Regulations, Title 24 of the Code of Federal Regulations, Part 570 which can be found at: http://www.ecfr.gov/cgi-bin/text-idx?c=ecfr&tpl=/ecfrbrowse/Title24/24cfr570_main_02.tpl . Applicants are strongly encouraged to become familiar with these regulations. The County's office of CDBG will provide applicants with technical assistance, interpretation of regulations and support upon request.

Municipalities may apply for no more than two projects/activities; however, no single project/activity can exceed \$50,000 in its request for CDBG funds. Please ensure that budgets consider the CDBG funding limits when conceptualizing the scope in the application. Municipalities submitting more than one request must use a separate application form for each project along with the requested documentation for each. Applications submitted by Agencies and Non-profits that apply for funding for eligible structural improvements (not public service activities) will be determined based on funding levels and priority needs of the County.

II. PROJECT SELECTION CRITERIA

A. Project Eligibility – only projects listed under Eligible Activities will be considered for funding

National Objective – CDBG statute mandates that funded activities must meet one of three National Objectives. In order to meet CDBG objectives, Gloucester County gives highest priority to activities that benefit low and moderate-income residents.

1. Benefit to low- and moderate- income persons

- a) Area Benefit: Service area for the activity has a predominantly lower income population
 - (1)As an Exception Level County, Census block group areas with a low-mod population of more than 42.5% are eligible.
 - (2)If the service area for an activity is smaller than a block group, that activity may trigger the need for an income survey to be performed. Contact CDBG prior to undertaking a survey.
- b) Presumed benefit

(1) Removal of Architectural Barriers – such projects are presumed to meet a low-mod objective

(2) Providing a facility or service to one of the following categories of persons including, but not limited to: abused children, battered spouses, elderly persons, severely disabled adults, homeless persons, persons living with AIDS

c) Income Intake – activities that may require income qualification to receive benefits

2. Elimination of Slums and Blight

a) The designated area must meet the definition of a slum, blighted, deteriorated or deteriorating area under state or local law.

b) Demolition or Rehabilitation of properties that qualify under this category. No activity for demolition will be funded unless the municipality's proof of ownership is included with application.

c) Historic Preservation Activities

3. Urgent Need – Qualified activities must meet the following conditions: Existing conditions:

a) must pose a serious and immediate threat to the health or welfare of the community;

b) are of recent origin or recently became urgent (generally within 18 months);

c) grantee is unable to finance the activity on its own; AND

d) Other sources of funding are **not** available

B. Project Timeliness – Projects must be ready for implementation upon application.

Municipalities will have 12 months within the effective Program Year (Sep 1-Aug 31) to complete the project and expend the grant allocation in order for the County to comply with HUD's expenditure deadline. CDBG funds become available from HUD in or around November of the Program Year.

C. **Past Performance** – CDBG will review the applicant's past performance in the CDBG program with particular attention to the timely implementation of previously funded activities. Scoring of the application may be adversely affected if previous projects were not completed within the imposed limits.

D. **Matching Funds/Leveraging** – As CDBG funding has been reduced by HUD, **it is strongly recommended** that applicants secure other sources of funding to leverage project costs. As a regulation, only architectural and engineering services (soft costs) that have been procured through federal labor standards will be reimbursed at a maximum 20% of project award. However, soft costs incurred by the applicant (as well as force labor accounts) will qualify as leveraged funds on the application. Matching funds include but are not limited to other local and state grants or loans, municipal and private funding. Supporting documentation must be attached to the application.

E. **Severity of Issue** – Priority will be given to activities that address significant health and safety concerns. Examples of activities are sewer, water, and storm drainage where the health and safety of low-moderate income residents are compromised.

III. ELIGIBLE ACTIVITIES

The following is a listing of general categories of eligible activities. In addition, project related architectural and engineering costs may be funded when part of an eligible project and comply with Gloucester County Housing and Community Development Program Policy and Procedures manual. Specific information on these and other activities can be found in Exhibit A.

- Public Facilities Improvements
- Barrier Free ADA Improvements
- Street Improvements

- Sidewalks
- Parking Facilities
- Flood Drain Improvements
- Water/Sewer Improvements
- Demolition of Blighted/Condemned Properties
- Park & Recreation Projects
- Neighborhood Facilities
- Senior Centers
- Historic Preservation
- Asbestos Removal Activities
- Housing Rehabilitation

IV. INELIGIBLE ACTIVITIES

CDBG funds may not be used for equipment or buildings used for general government activities or maintenance activities except that improvements to municipal buildings to provide barrier free access may be undertaken.

V. ACTIVITY LIMITATIONS

Planning, administration and other activities listed in Part 570.205 and 570.206 will not be funded.

No activity will be funded which will result in the demolition or conversion to other use of occupied or vacant habitable low moderate income dwelling units or which will cause displacement of persons from their homes.

Engineering and architectural design fees will only be eligible if the professional services are competitively procured. CDBG will assist in the procurement process if necessary. If a municipality elects not to undertake this Request for Proposal process, such fees will not be eligible costs.

All projects must comply with federal and local requirements, including but not limited to, Davis-Bacon prevailing wage requirements, Equal Employment Opportunity (EEO), and Environmental Review.

VI. APPROVALS AND IMPLEMENTATIONS

Applicants with activities that have been selected and approved to be included in the County's program year application to HUD will be notified in writing. All proposed projects are subject to local and state environmental review. Final approval from HUD is required before any activities can be funded. Activities that are approved for the program year must be completed within a strict time period anticipated to begin November of the program year and end in August of the following year.

Once a project is selected for inclusion in the Annual CDBG program, no change of activity will be permitted. No project substitution will be allowed. Only projects awarded below the funding application may request a change in scope of activity that is proportionate to the funds awarded.

If funded, recipients will be held to an implementation schedule that completes the proposed activity within the established period. In developing proposed activities, applicants must look at all factors affecting the implementation time of the activity; i.e. design, permitting, contracting or manpower, other funding sources, etc., to be sure they can be coordinated to work within the established time frame for the project. Penalties will be imposed in future funding years for applicants that do not complete activities within the period.

No project may begin without written authorization to proceed from the CDBG Office. Notification of Award of funding is NOT authorization to proceed. Vouchers will not be processed for payment for activities undertaken without prior approval. This includes pre-construction activities.

VII. PROJECT PHOTO REQUIREMENTS - Per NJ DEP

A set of four (4) clear photographs, 3x5 or larger must be submitted with application. Polaroid photographs or photocopies are not acceptable. Digital copies may be submitted along with hard copies but not in substitution thereof. High quality digital or scanned images are acceptable provided they offer the visual clarity of traditional printed 35mm photos. Each print should be labeled with the project name. Photographs should be numbered and keyed to a map of the project area or site plan to illustrate the location and orientation of the camera for each one.

Content of photos should be as follows:

- Photos of the project site taken from the outside inward from several angles to illustrate the project site, adjacent buildings, ground conditions and landscape elements;
- Photos from the project site looking outward to illustrate the project vicinity in the four cardinal directions;
- Projects with an area of potential effect (APE) which extends beyond one building require photographs taken from several locations within the APE at varying distances from the project site;
- Photographs of any buildings or sites discovered adjacent to the site or in the APE that are older than 50 years and therefore potentially eligible for listing on the National Register of Historic Places.

VIII. TIMELINESS

Enforcement of the time limit on spending is essential to the County meeting the spending deadlines established by HUD. Therefore, the following penalties for poor performance will be imposed.

If an applicant does not complete its project by the end of the sub-grantee agreement term, reduction or exclusion of funding in the next program year may result. The extent of reduction will be in compliance with HUD's timeliness guidelines. The CDBG staff reserves the option of granting extensions to project completion dates of no more than three months when additional time is warranted. The reduction will not be applied against an extension if CDBG personnel considered the extension to be warranted. Applicants that received an extension and do not complete the project by the end of the extension will receive additional reductions for each month of the late performance. CDBG personnel may also approve extensions to the term of a sub-grantee agreement for convenience when a project will not be completed by the original date. The reductions will be applied to an extension period if it was approved only for convenience (not as warranted).

IX. APPLICATION PACKET

The Community Development Division reserves the right to require additional information, not stated in the application packet, when deemed necessary to determine eligibility of a proposed activity or management capacity of the application.

PRESUMED BENEFITS

NARRATIVE OF PRESUMED BENEFITS

If the matrix code selected was an LMA type project (03) and any of its sub-letters, please indicate why the presumed benefits will affect the low/moderate residents of your municipality, if located outside of a DTN? Check Below:	
Handicapped Accessibility <input type="checkbox"/>	
Senior Citizens <input type="checkbox"/> Other <input type="checkbox"/>	

ADDITIONAL GOVERNMENT REQUIREMENTS

Respond to the following requirements:

A. Is the project located in a flood plain area of special flood hazard?

YES NO

If yes, does the municipality participate in a National Flood Insurance program? (Please attach documentation).

B. Will the project have any groundwater impacts?

YES NO

C. Is the project contingent upon other federal, state, or local governmental requirements, such as pending approvals, additional grants, or other impediments?

YES NO Date permit or grant awarded

If yes, please attach documentation explaining the situation.

D. Will the project require any or all of the below permits?

CAFRA N/A Stream DOT Wetlands NJDES
Coastal Area Stream DOT Wetlands NJDES
Facilities Act Encroachment

Projects with pre-approved permitting will receive priority status. (Conditional upon timeliness expenditure status on past allocations).

E. Is the proposed project located in a Pinelands designated area?

YES NO

If yes, will the project require any or all of the following items from the Pinelands Commission?

- Development Approval
- Certificate of Conformity
- Wavier of Strict Compliance

Projects with pre-approved permitting will receive priority status. (Conditional upon timeliness expenditure status on past allocations).

F. Are there any other known impediments to the project? Explain.

G. Has Governing body approved resolution for allocating municipal funds for projects?

YES NO

Certification and Official Authorization

I, _____, hereby certify that all parts of this application and all required attached documents are accurate to the best of my knowledge. I am also certifying that:

- The proposed project will not result in permanent involuntary displacement of any family, individual, business, non-profit organization or farm, or any of their personal property.
- Special assessments to recover capital costs of the proposed activity, either the CDBG funded or non-CDBG portion of costs, will not be made against properties owner and occupied by low and moderate-income persons.
- If selected to receive Community Development Block Grant, the project will be operated in accordance with all applicable laws and regulations, including the CDBG Entitlement Grant Regulations at 24 CFR Part 570, Civil Rights Acts, the Fair Housing Act and the Americans with Disabilities Act.
- I am authorized by the municipality or organization identified within to submit this application. *

I. Introduction

NJ Counts 2014

NJ Counts 2014, New Jersey's annual Point-In-Time (PIT) Count of the Homeless, provides a statewide snapshot of homeless households in our communities; where they find shelter, what their needs are, and what factors contribute to making them homeless. The 2014 Count reveals important demographic and other information about families and individuals who were homeless on the night of Tuesday, January 28th, 2014, and was carried out with the help of government agencies, community-based organizations, and local volunteers.

In New Jersey, each County's count is planned, coordinated, and carried out locally, and the information gathered enables each community to better allocate housing resources and services in order to prevent and end homelessness. The PIT Count is the only opportunity throughout the year for most communities to take a comprehensive look at the total homeless population, and is especially crucial in assessing the needs of the unsheltered homeless.

Acknowledgements

Monarch would like to thank all Point-In-Time Coordinators, homeless service providers, agencies, and volunteers who participated in NJ Counts 2014. Monarch would also like to specifically thank Bergen County for providing both Spanish and Korean translations of the 2014 paper survey tool.

Finally, a special acknowledgement is given to all the respondents who were willing to share personal information about themselves and their households' experiences in order to help our communities better understand and assist the homeless.

Funding for coordinating New Jersey's 2014 Point-In-Time and producing this report was provided by New Jersey's Housing and Mortgage Finance Agency (NJHMFA).

This Report

The findings in this report are presented in the following sections:

1. Total homeless population;
2. Those experiencing chronic homelessness (families and individuals that have been homeless for a year or longer, or who have experienced at least four episodes of homelessness in the last three years, and have a disabled head of household); and
3. Unsheltered families and individuals;

The structure of this report is intended to provide not only an overall snapshot of the homeless population counted in the Point-In-Time, but also to focus attention on the homeless subpopulations that are the most in need, and those that represent federal funding priorities set forth by the U.S. Department of Housing and Urban Development (HUD).

In addition to the main findings presented in the body of this report, Appendix A includes charts illustrating the responses to all survey questions that were part of the 2014 Point-In-Time Count.

II. Data Collection and Methodology

Requirements for the Count

As part of its Continuum of Care (CoC) application for homelessness funding, HUD requires that jurisdictions across the nation conduct a statistically reliable and unduplicated count of the homeless for one overnight period during the last 10 days of January. New Jersey's Continuums of Care (regional networks of organizations, agencies, and community stakeholders that plan local efforts to help the homeless) conduct an annual count of sheltered homeless persons (i.e. persons in emergency shelter, transitional housing for the homeless, and Safe Haven programs) and at least a biennial count of unsheltered homeless persons. 2014 was not a HUD-required full count year.

In their Point-In-Time Count, CoCs must count and report all individuals and families who meet the criteria in paragraph (1)(i) of the homeless definition in 24 CFR 91.5 of HUD's Homeless Definition Rule on the night designated for the count. This includes individuals and families who are:

- **Sheltered**, or "living in a supervised publicly or privately operated shelter designated to provide temporary living arrangement (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low-income individuals)," or
- **Unsheltered**, "with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground."

Because this report focuses on those respondents who meet HUD's definition of homeless, it does not include information about those who may be at risk of homelessness, precariously housed, or considered homeless under other federal statutes. Persons who, on the night of the count, were living doubled up with another household, living in illegal or overcrowded units, being discharged from a jail or health facility with no subsequent

residence, scheduled to be evicted, or paying for its own motel unit were not considered homeless. All survey information collected for respondents who were at risk of homelessness or precariously housed was preserved and shared with each community for local planning purposes, but is not included in this report unless otherwise noted.

Data Collection Methods

Monarch Housing Associates provided each of New Jersey's 21 counties with in-person training, online video and print training guides, a practice online survey tool, and technical assistance to aid in the data collection process for New Jersey's 2014 Point-In-Time Count. Point-In-Time Coordinators in each county disseminated PIT training materials and helped facilitate local planning around implementation of the PIT count in their communities.

This year marked the beginning of a new process for collecting survey data for New Jersey's PIT Count. The count of homeless persons who were sheltered on the night of January 28th, 2014 was primarily taken from New Jersey's Homeless Management Information System (HMIS), while the count for the unsheltered and those sheltered by non-HMIS programs was conducted using a revised Paper Survey tool, personal interviews, and agency client records. This strategy was designed in accordance with HUD guidance regarding conducting both sheltered and unsheltered Point-In-Time Counts.

The 2014 PIT Survey tool was updated to more closely mirror information collected in HMIS so that the data was comparable for important factors such as household characteristics, income, services needed, and factors contributing to homelessness. Agencies updated all HMIS data to accurately reflect the night of the count, and those with programs that were non HMIS-participating submitted information from interviews utilizing the Paper Survey tool through SurveyMonkey.

Limitations

1. HUD requires a count of sheltered homeless persons and families annually, but only a biennial count of those who are unsheltered. Even though New Jersey conducts both a sheltered and unsheltered count each year, the comprehensiveness of the unsheltered count may be influenced by the fact that it is not a HUD-required full count year. This report includes comparison data from 2010 to 2014. 2010, 2012, and 2014 were not HUD required full reporting years while 2011 and 2013 were.
2. The winter of 2013 to 2014 was particularly cold, setting record low temperatures in parts of New Jersey. The night of the count, January 28, 2014, was cold enough to warrant a 'Code Blue' in many communities, which mandates that emergency warming stations or shelters be set-up for the unsheltered. While this means that many more people are able to sleep in a warm place, it may skew Point-In-Time data to show fewer unsheltered households than are actually present in communities on a regular basis.

3. The information presented in this report is based on survey interviews and agency HMIS records. In some cases, survey respondents did not answer every question completely, and homeless provider agencies did not report all client information on the night of the count. For this reason, the numbers and percentages reported may not equal the total number of homeless respondents due to missing data. All numbers, percentages, and figures contained in this report are calculated based on the total number of actual responses, and do not represent null or missing values unless otherwise noted.
4. Because the Point-In-Time Count represents only one night during the last ten days of January, it is widely accepted that the PIT will undercount the overall homeless population. Undercounting may occur due to difficulty finding those living on the street, incomplete information for people who do not agree to complete the survey, a shortage of volunteers to cover a geographic area, or homeless persons choosing not to seek housing services on the night of the count. This data should not be viewed as a comprehensive measurement of all families and individuals who experience homelessness throughout the year, but rather as a minimum number of persons who experience homelessness in New Jersey on a given night.

De-duplication

Monarch Housing Associates collected and merged all HMIS and SurveyMonkey Point-In-Time data from each community into its combined database. Monarch generated two unique identifiers, one more general and one more in-depth, based on the identifying information for each individual record. Using a formula, these unique identifiers were compared to all identifiers for other records in the database to identify potential duplicates.

All duplicates detected through comparison of unique identifiers were then de-duplicated by the following process:

1. Multiple HMIS records where all fields match – a single record was preserved, and all duplicates were removed;
2. Multiple SurveyMonkey records where all fields match – a single record was preserved, and all duplicates were removed;
3. Comparing HMIS to SurveyMonkey records where unique identifiers, disabilities, income sources, household size, and location on the night of the count all match – the HMIS record was preserved and the SurveyMonkey duplicates were removed.

Following this de-duplication of the data, communities were given preliminary data to review all identified duplicates and records with missing data. Communities were then able to update records with missing information and/or request any additional de-duplication they determined prudent. Monarch then updated and removed additional records based on community feedback prior to completing its final analysis and report.

III. Findings for Total Homeless Population

Key Findings

- On the night of January 28th, 2014 a total of 309 households, including 585 persons, were experiencing homelessness in Gloucester County, according to the 2014 Point-In-Time Count.
- A total of 12 households, with 20 persons, were identified as chronically homeless.
- 4 adult-only households, with 5 unsheltered homeless persons were counted.

Total Homeless Population

On the night of January 28th, 2014, a total of 585 persons, in 309 households, were experiencing homelessness in Gloucester County, according to the 2014 Point-In-Time Count. This is an increase of 371 persons (173%) and 175 households (130%) from 2013. Gloucester County had 4% of New Jersey’s statewide homeless population in 2014.

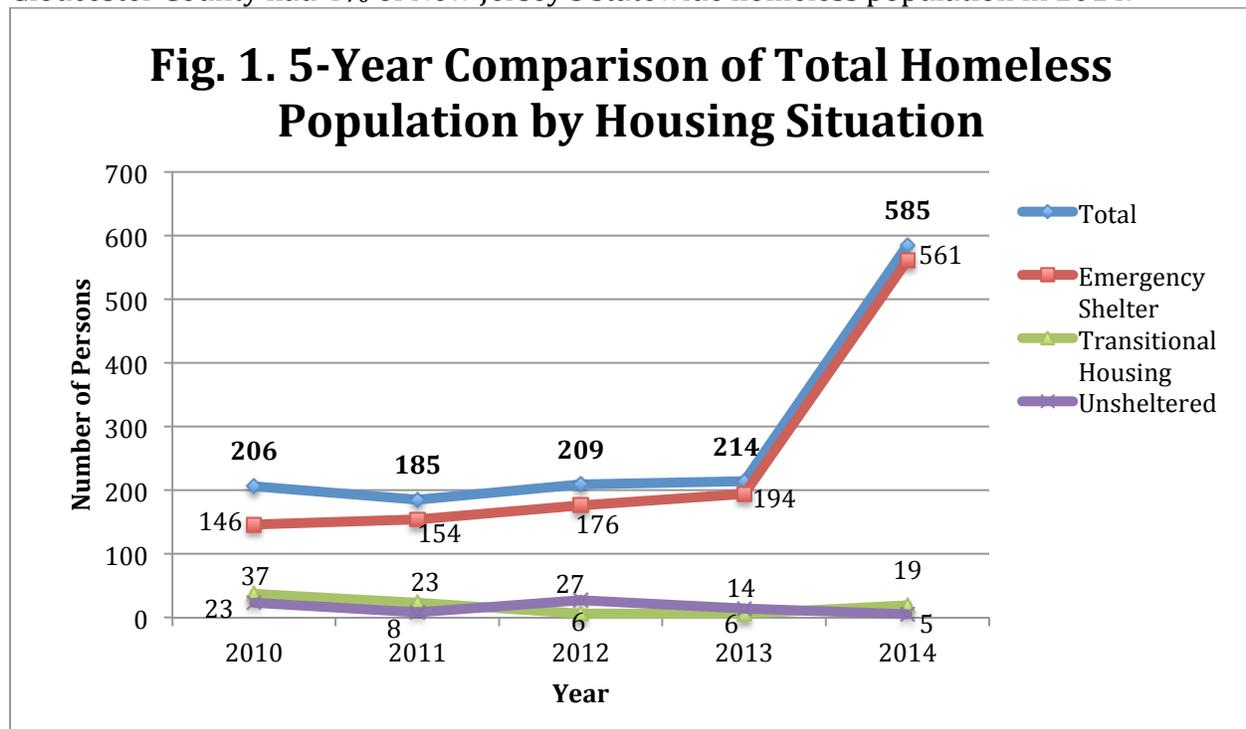

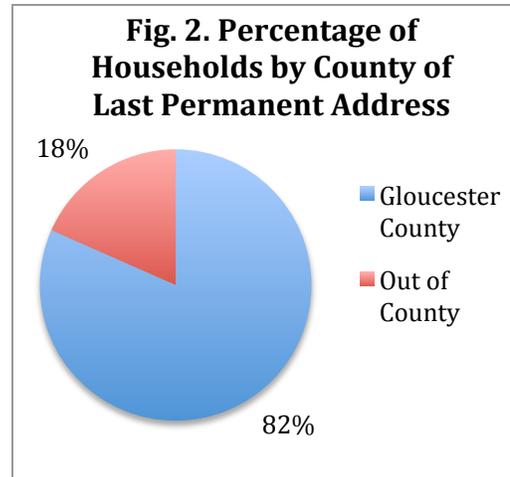

Figure 1 shows that, in 2014, 561 homeless persons stayed in emergency shelters, 19 stayed in transitional housing, and 5 were living unsheltered on the night of the count. The number of those in emergency shelters jumped up by 367 (189%) in the past year. A large portion of the increase in 2014 can be attributed to the fact that clients who were receiving Temporary Rental Assistance (TRA) from the Board of Social Services were counted as homeless persons in emergency shelter unlike past years. This was done in recognition that the County utilizes TRA as part of their homeless service system. The number of those in transitional housing on the night of the count rose by 13 (216%). The totals of those living unsheltered, however, sharply decreased, dropping by 9 (64.3%).

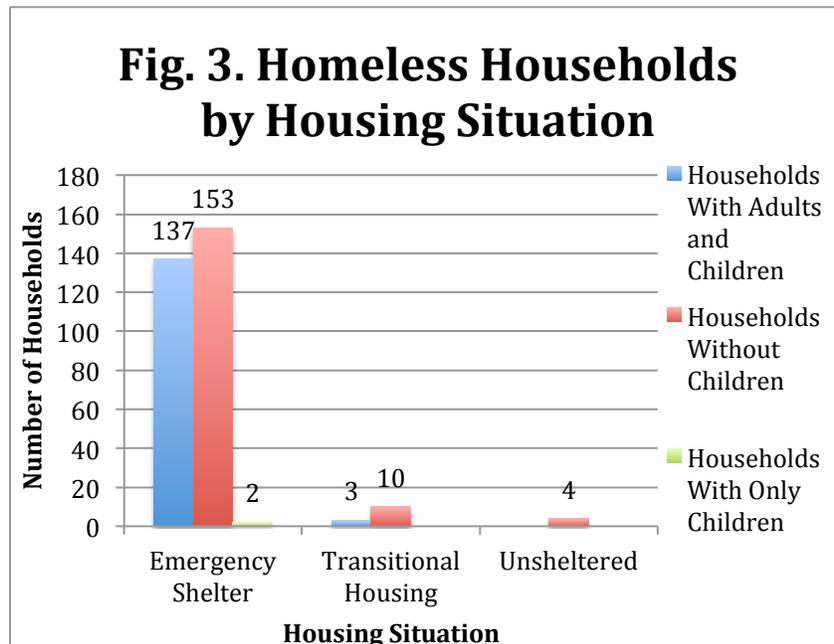

Gloucester County has seen an increase in the overall number of homeless persons in the past five-years (379 persons, 181%). During the same five-year period, the number of persons in emergency shelter on the night of the count increased while the number of unsheltered persons and those in transitional housing both declined.

As Figure 2 shows, in 2014 13% of homeless households in Gloucester County reported that their last permanent address prior to becoming homeless was outside of the county.

Homeless Families and Individuals

When reading the data regarding different types of homeless households, it is important for the reader to remember that, in this report, 'household' means "any group of persons who, if they were able to attain permanent housing, would choose to live together; and, shared the same sleeping arrangements on the night of the count." Three different types of households are discussed below: households with adults and children under 18 ('families'), households without children ('individuals'), and households with only children under 18 ('unaccompanied youth').

Of the 309 homeless households counted in Gloucester County in 2014, 140 (45.3%) were families with at least one child under the age of 18 and one adult. These families included 400 persons, 240 children under age 18, and 160 adults. The average family size was 2.9 persons. Figure 3 shows that 137 of the families were staying in emergency shelter (97.8%), and 3 were in transitional housing programs for the homeless (2.2%). There were no unsheltered families counted.

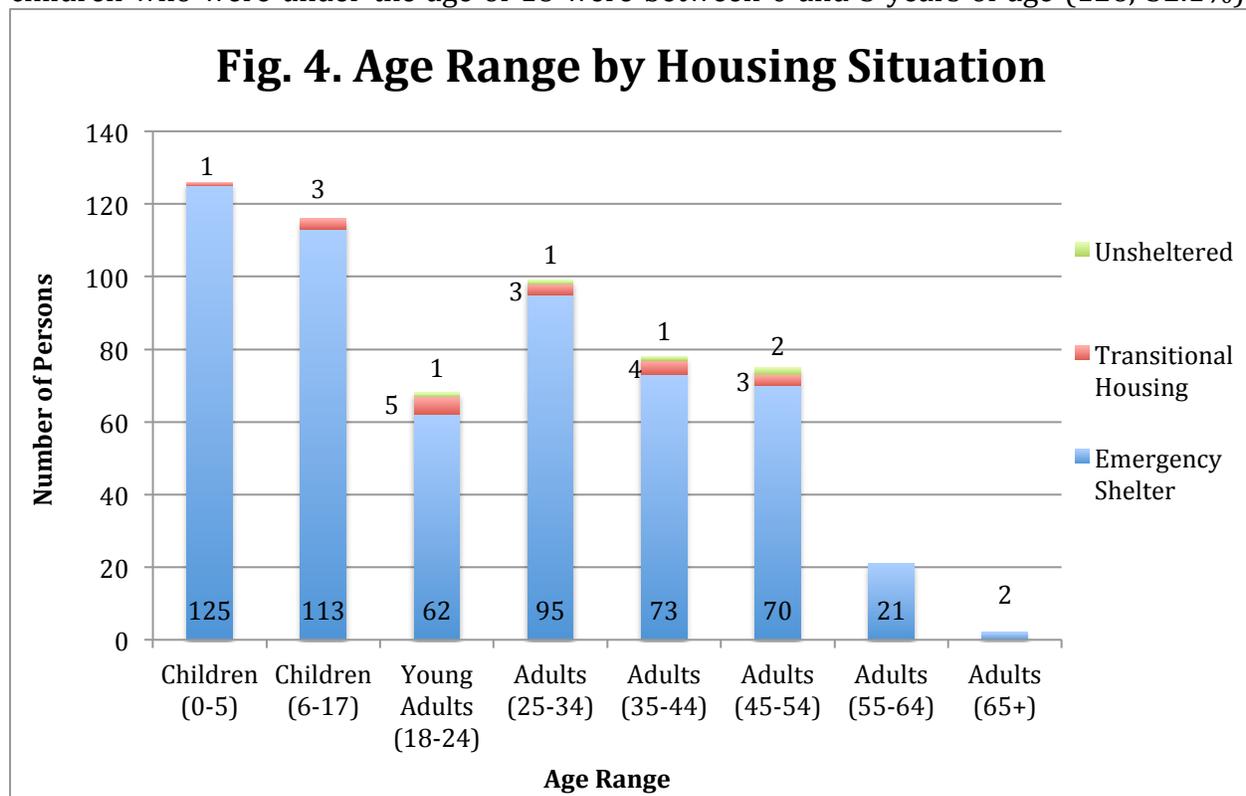

In 2014, Gloucester County counted 87 more homeless families than in 2013, an increase of 164%.

54% (167) of the homeless households in Gloucester County were households without children under 18, and they were composed of 183 adult individuals. 153 (91.6%) of these adult-only households were staying in emergency shelters, 10 (6%) were in transitional housing, and 4 (2.4%) were unsheltered. Gloucester County has seen the number of adult-only households increase by 86 (6.2%) since 2013.

As Figure 3 indicates, 2 (0.6%) households with only children under 18 years old were reported in 2014. This represents an increase of 2 households from 2013. These households had only 1 child each and both were staying in emergency shelter on the night of the count.

Demographics

There were a total of 68 (11.6%) homeless adults between 18 and 24 years old, 275 (44%) adults over age 24, and 242 (41.4%) children under 18 years old experiencing homelessness on the night of the count. Figure 4 shows that the majority of homeless children who were under the age of 18 were between 0 and 5 years of age (126, 52.1%).

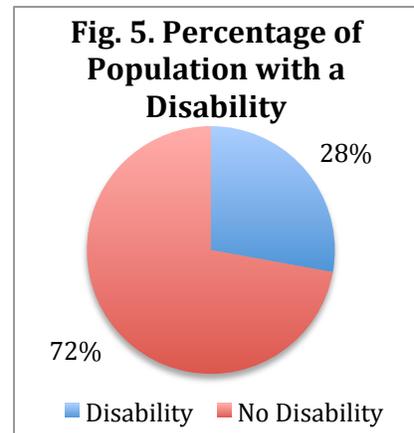

Children 0 to 5 years old, and children 6 to 17 years old, are also the two age ranges most represented among the homeless population. Among adults, more were between 25 and 34 years old than any other age range (28.9% of adults). Only 2 persons (0.3%) were over the age of 65.

57.4% (336) of homeless respondents were female, and 42.6% (249) were male.

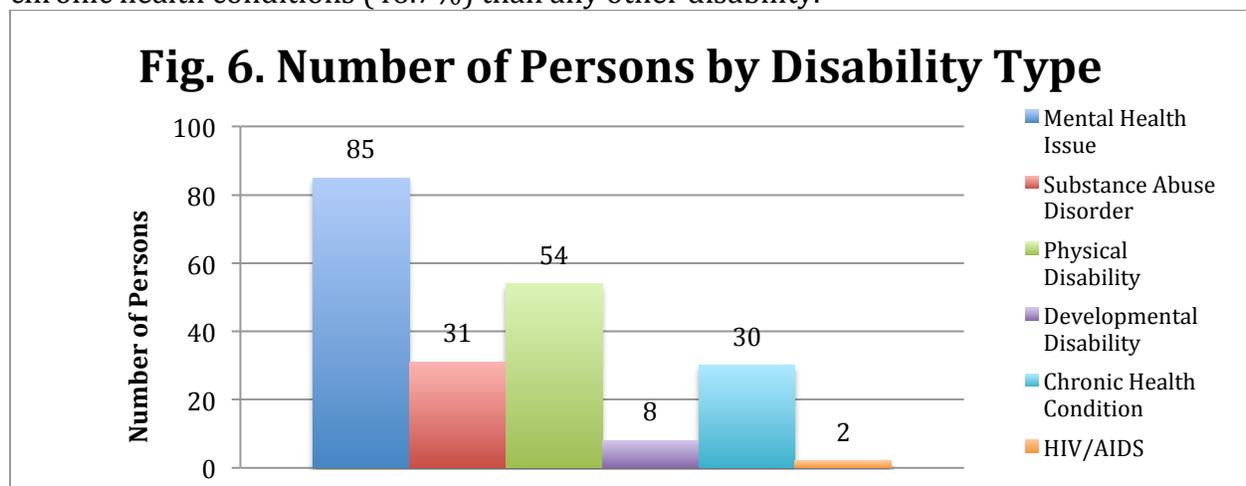

50.4% of respondents identified their race as White, making that the largest racial subgroup of homeless persons reported. The next largest group self-identified as Black or African-American (46.7%), followed by those identifying as American Indian or Alaska Native (1.4%), Multi-Racial (1%) and Asian (0.5%). With regard to ethnicity, 10.5% of respondents identified themselves as Hispanic, or Latino.

Disabilities

Figure 5 illustrates that 28% of homeless persons reported having some type of disability. 43.1% of adults reported some type of disability compared to 6.2% of children. Figure 6 shows the number of the homeless persons that identified as having various disabilities. The most common disabilities identified include mental health issues and physical disabilities.

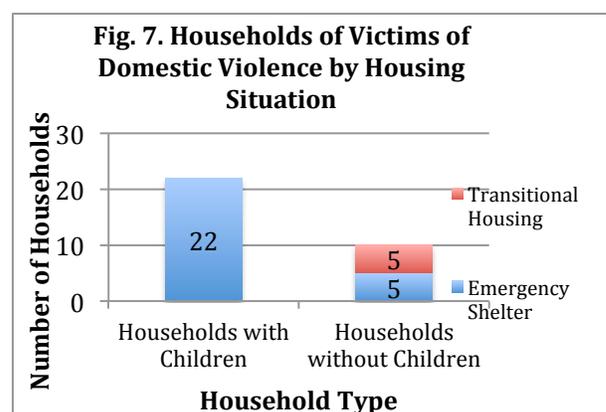

Among disabled adults, 53.4% reported mental health issues making this the most prevalent disability (23% of total adult population). More disabled homeless children had chronic health conditions (46.7%) than any other disability.

Victims of Domestic Violence

On the night of the count, in Gloucester County, 32 homeless households reported having a victim of domestic violence (See Figure 7). The majority (68.7%) of these households were families with at least one adult and one child under the age of 18, one of which reported staying in a domestic violence shelter; all other households in emergency shelter were in other shelters. 5 of the 10 adult-only victim households were staying in transitional housing.

Veterans

In its plan, *Opening Doors: Federal Strategic Plan to Prevent and End Homelessness*, the United States Interagency Council on Homelessness (USICH) has prioritized ending homelessness among veterans by 2015. Many communities in New Jersey have also been working hard to end homelessness among our country's servicemen and women.

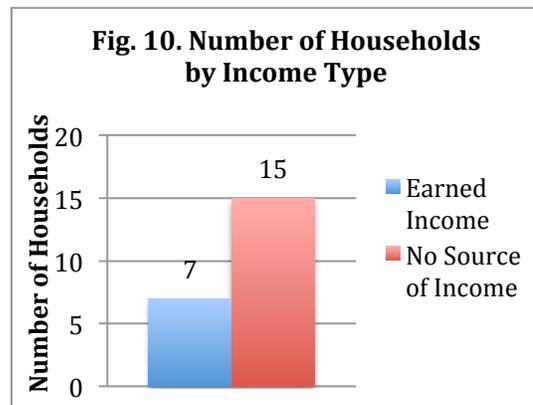

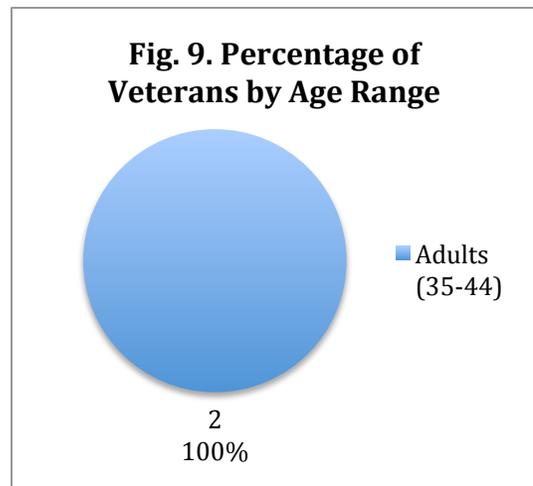

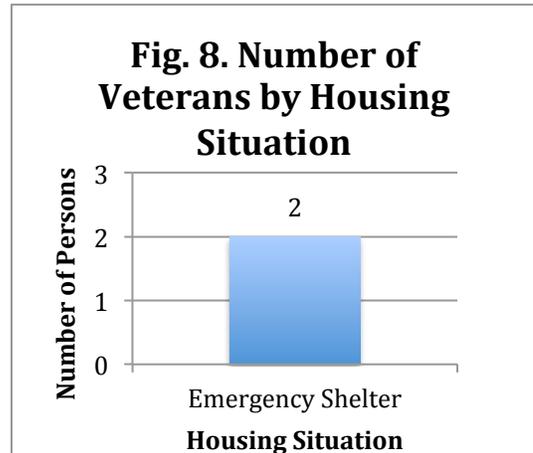

2 homeless veterans were counted on the night of the count, 1 (33%) fewer than in 2013. Both were single, adult individuals staying in emergency shelter on the night of the count.

The 2 veterans experiencing homelessness in Gloucester County were both male, and 1 identified his racial background as White (50%), while the other identified as Multi-Racial. Figure 9 illustrates that both homeless veterans were between 35 and 44 years of age.

1 veteran, 50%, reported having a physical disability, while the other reported no disability. The types of services that homeless veterans sought were emergency shelter, and financial assistance for housing and utilities, employment assistance, educational training, transportation, and veterans' services.

Income and Benefits

Among all those experiencing homelessness on the night of the count, 4.8% reported no source of income, and 2.2% reported receiving some kind of earned cash income. The two most common sources of income among respondents were Temporary Assistance for Needy Families (TANF) and General Assistance (GA), with 44% and 34.6% receiving each, respectively. Figure 11, below, shows the average monthly income for all homeless households.

	Emergency Shelter	Transitional Housing	Unsheltered
Average for All Households	\$351.06	\$608.62	\$400.00

3.5% of homeless households reported receiving no kind of non-cash benefit on the night of the count. Food Stamps, or the Supplemental Nutrition Assistance Program (SNAP), was the top reported non-cash benefit, and was received by 77.3% of respondents. 10.7% were receiving temporary rental assistance from the Board of Social Services, and 67% were receiving Medicaid.

Length of Homelessness

As Figure 12 shows, 104 (33.7%) of the homeless households reported that their most recent, continuous episode of homelessness had lasted from more than 1 year, while 49 (15.9%) reported that they had been homeless between 6 months and 1 day and 1 year. These two responses account for nearly half of all respondent households. This means that 49.5% of all homeless households in Gloucester County had been experiencing homelessness for more than 6 months on the night of the count.

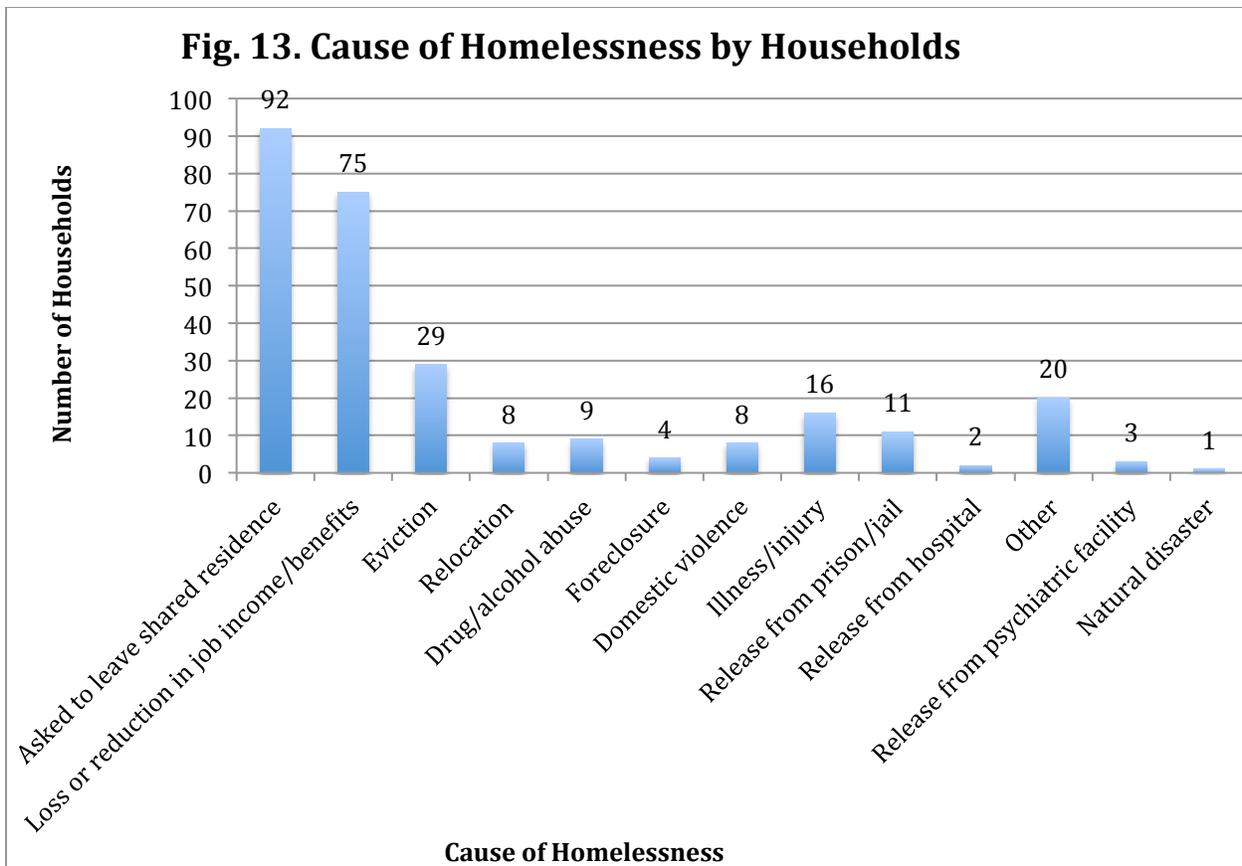

As Figure 12 shows, 104 (33.7%) of the homeless households reported that their most recent, continuous episode of homelessness had lasted from more than 1 year, while 49 (15.9%) reported that they had been homeless between 6 months and 1 day and 1 year. These two responses account for nearly half of all respondent households. This means that 49.5% of all homeless households in Gloucester County had been experiencing homelessness for more than 6 months on the night of the count.

Cause of Homelessness

When asked to share the primary factor that contributed to, or caused, their homelessness, more households attributed their homelessness to being asked to leave a shared residence (92 households, 29.8%) than any other cause. As Figure 13 shows, the next most common factor reported was a loss or reduction of job income or benefits (24.3%).

When households were asked ‘what was your residence prior to your current living situation?’ more said they were staying or living with friends or family (32%) than any other type of residence. 28% reported residing in permanent housing and 22% said they were in emergency shelter prior to their current living situation.

IV. Findings for the Chronically Homeless

Someone with a long-term disabling condition, who has been continually homeless for a year or more, or at least four times in the past three years, meets HUD’s definition of chronically homeless. Any family with one adult that meets this definition is considered a chronically homeless family.

In 2010, USICH established the goal of ending chronic homelessness by 2015. This goal reflects the urgency of helping to house those persons who have not been able to remain stably housed over the course of an extended period of time. Chronically Homeless persons are among the most vulnerable homeless groups, and providing effective supportive services and case management may be required in order to help some stay in the housing they need. Prioritization of new Continuum of Care funding opportunities has recently been giving some communities in New Jersey new resources for housing this subgroup.

Total Chronically Homeless Population

12 households, made up of 20 total persons, were chronically homeless in Gloucester County, according to the 2014 Point-In-Time Count. This is an increase of 3 persons (17.6%) from 2013. This small increase, in conjunction with higher homelessness in the County overall, caused the rate of chronic homelessness to shrink as a percentage of the overall homeless population from 7.9% to 3.4%.

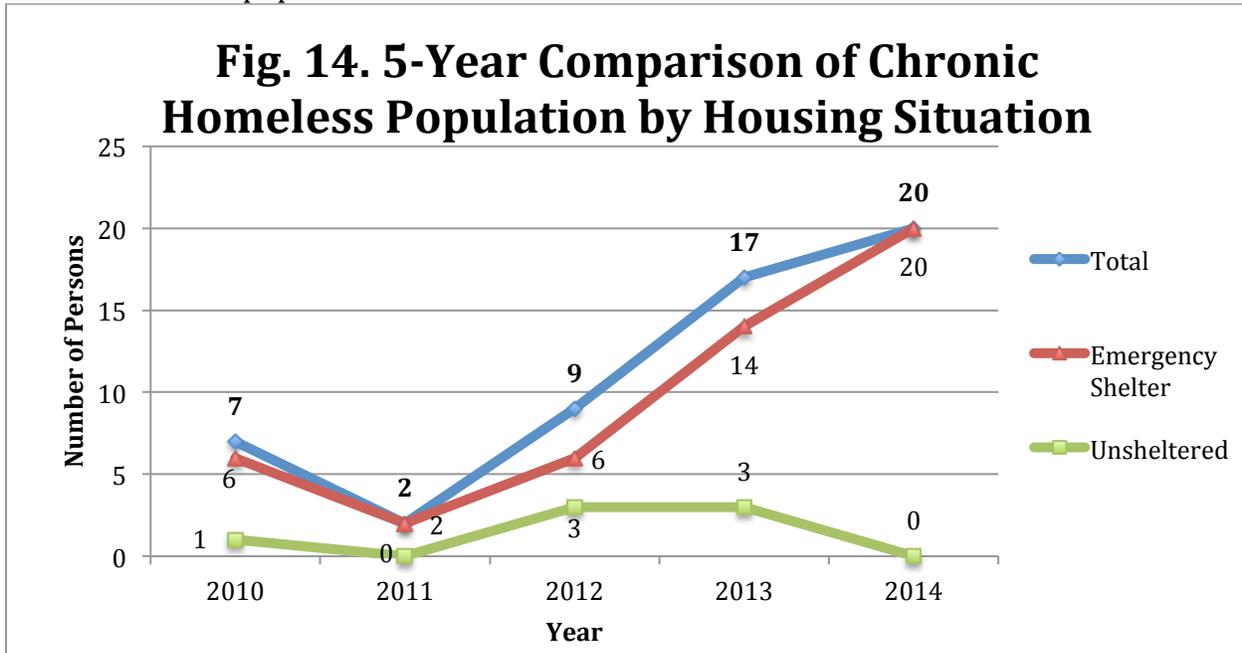

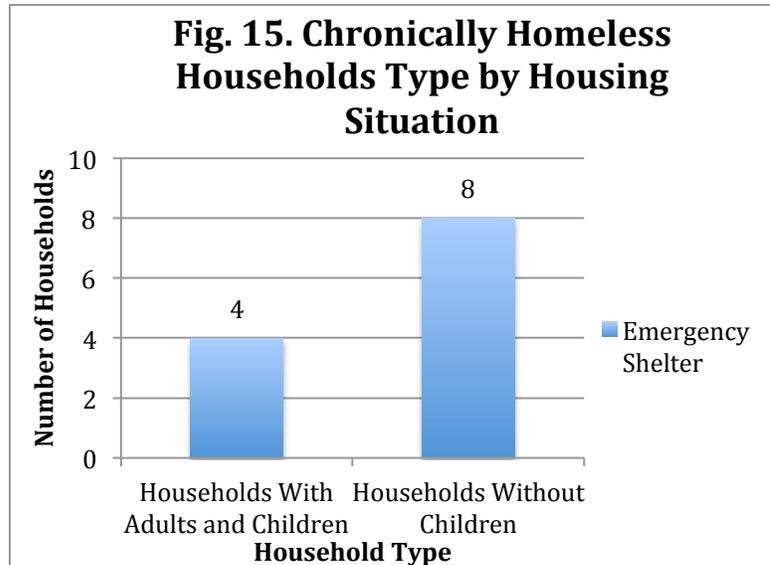

Figure 14 shows the number of chronically homeless respondents who were in emergency shelters or living unsheltered in Gloucester County from 2010 to 2014. Over the past four years the total of chronically homeless persons counted has gone up each year. Since 2010, the numbers of chronically homeless persons in emergency shelters has risen by 233%. The number of unsheltered chronically homeless persons has dropped 100%, however, with 0 counted on the night of the count in 2014.

Families and Individuals

In the interest of giving an accurate comparison, the total number of chronically homeless households and persons in the previous section reflects all the information required for submission to HUD for this subpopulation, including the total number of chronically homeless adult individuals and the total number of persons in chronically homeless families. However, this number excludes any adults who were part of an adult-only couple with a chronically homeless individual and any youth in youth-only households. Therefore, the analysis below also includes data for 2 adult individual who were part of adult-only couples, keeping the total number of chronically homeless households at 12, but bringing the total number of chronically homeless persons to 22.

Of the 12 chronically homeless households counted in 2014, 4 (33%) were families with at least one child under the age of 18 and one adult. These families included 12 persons (33% more than 2013), and the average family size was 3 persons. All chronically homeless families stayed in emergency shelters on the night of the count.

There were 10 chronically homeless persons in 8 households with no children 17 or younger counted in Gloucester County, making up 67% of the chronically homeless population. All were sheltered in emergency shelters, the same number of households as in 2013. 25 None of these adult households were unsheltered on the night of the count, a decrease from 3 last year.

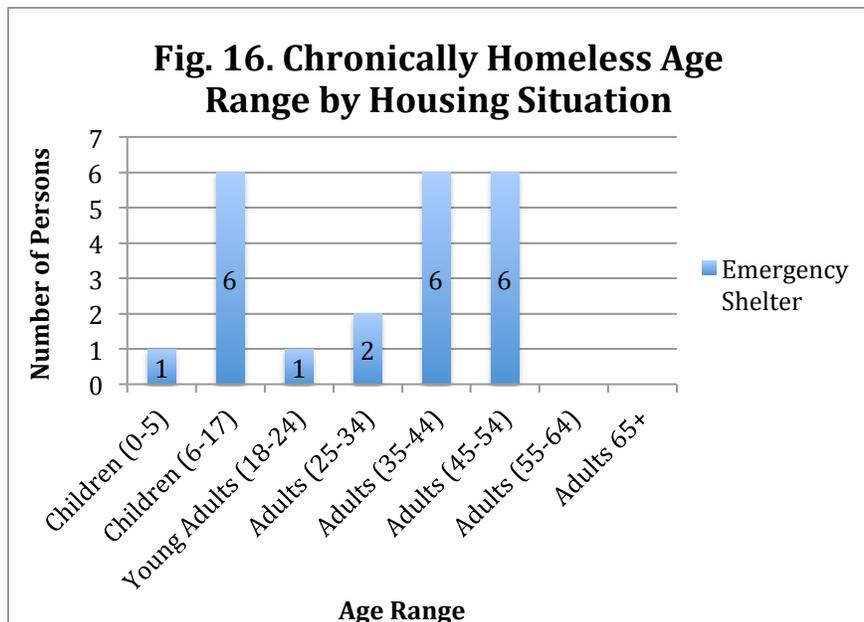

25 None of these adult households were unsheltered on the night of the count, a decrease from 3 last year.

Demographics

Of the 22 total chronically homeless persons, 1 (4.5%) was between 18 and 24 years old, and 7 (32%) were children 17 or younger. The largest number of chronically homeless adults (6, 27%) fell between the ages of 35 and 44, and between 45 and 54 years of age.

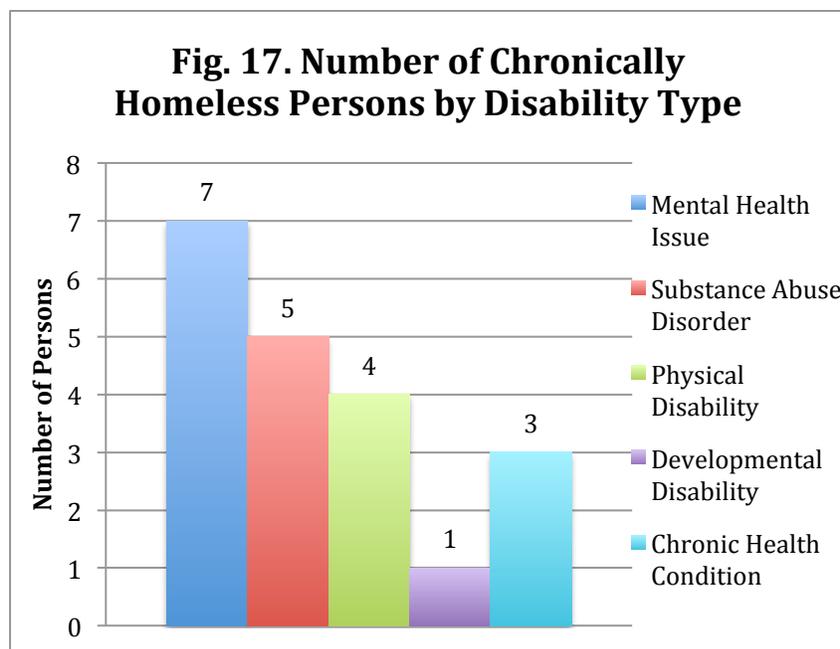

45.4% of those counted as chronically homeless were male, and 54.6% were female.

The largest racial subgroup of homeless persons reported their race as White (54.6%). The next largest group self-identified as Black or African-American (27.3%), followed by persons identifying as Multi-Racial (13.6%) and American Indian or Alaska Native (4.5%). With regard to ethnicity, 0% of respondents identified themselves as Hispanic, or Latino.

Disabilities

In order to meet the definition of chronically homeless, at least one adult in each household must have some kind of disability. The disabilities most commonly identified were mental health issues (31.8%) and substance abuse disorders (22.7%). The complete numbers of reported disabilities among the chronically homeless can be seen in Figure 17.

Subpopulations

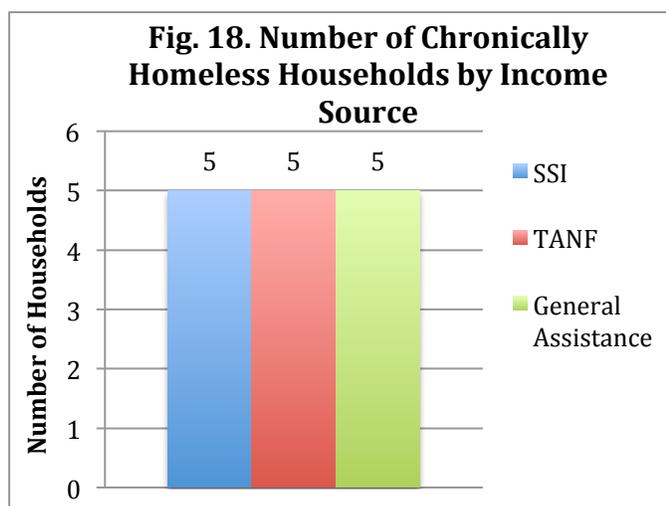

On the night of the count, 1 chronically homeless person in Gloucester County reported being victims of domestic violence (4.5%). This person was in household of 4 with children under the age of 18.

There were 0 veterans identified as chronically homeless on the night of the count.

Income and Benefits

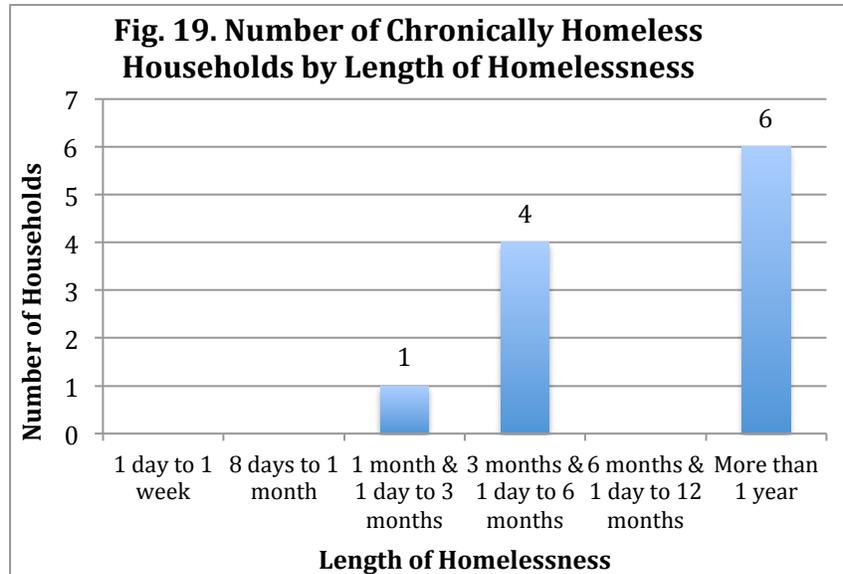

Among all the chronically homeless households on the night of the count, 0 reported receiving no form of cash income, and 0 also reported any earned income. Figure 18 shows the sources of income received. The most common sources of cash income among all respondents can be seen in Figure 18.

0 of chronically homeless households reported they were not receiving any type of non-cash benefit on the night of the count. Food Stamps (SNAP) was the top reported non-cash benefit among this population, with 50% receiving this benefit. A significant percentage also reported receiving Medicaid (40.9%) and temporary rental assistance from the Board of Social Services (4.5%).

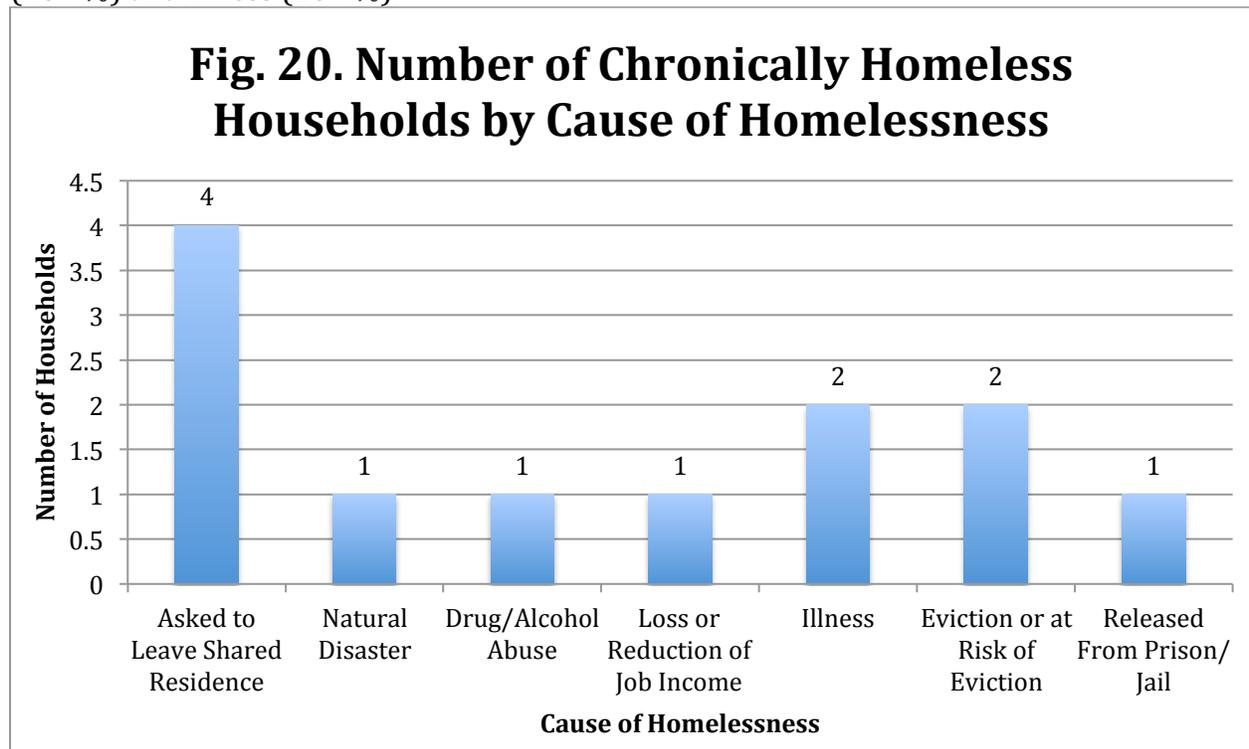

Length of Homelessness

Figure 19 shows that 6 chronically homeless households (50%) reported that their most recent, continuous episode of homelessness had lasted for more than 1 year. This was the most common answer followed by 33% reporting being homeless between 3 and 6 months.

Cause of Homelessness

When asked to share the primary factor that contributed to, or caused, their homelessness, more chronically homeless households cited being asked to leave a shared residence (33%) than any other. As Figure 20 shows, other common factors reported included eviction (16.7%) and illness (16.7%).

V. Findings for the Unsheltered Homeless

HUD’s definition of “unsheltered homeless” applies to any individual or family “with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground.”

Unsheltered homeless individuals and families are among those with the most critical housing needs in a community. The unsheltered are especially vulnerable in the cold weather and the elements, which are in evidence at the end of January when the Count takes place. The Point-In-Time survey can play an important role in helping communities understand why some of the homeless remain unsheltered, and who is included in this group.

Total Unsheltered Homeless Population

4 households, made up of 5 persons, were living unsheltered in Gloucester County, according to the 2014 Point-In-Time Count. This is a decrease of 9 (6.9%) households, and 9 persons (6.4%) from 2013.

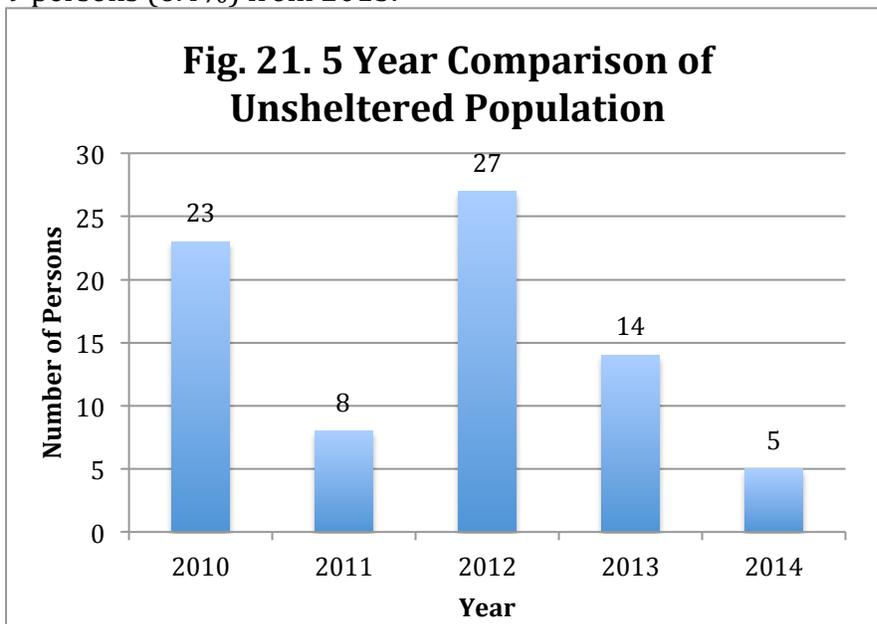

Figure 21 shows the number of unsheltered respondents from 2010 to 2014. Over the past five years, while the numbers have fluctuated, the total number of unsheltered persons has been reduced overall. Since 2012, the number of unsheltered homeless persons has dropped 8.1%, and by 78.3% since 2010.

Families and Individuals

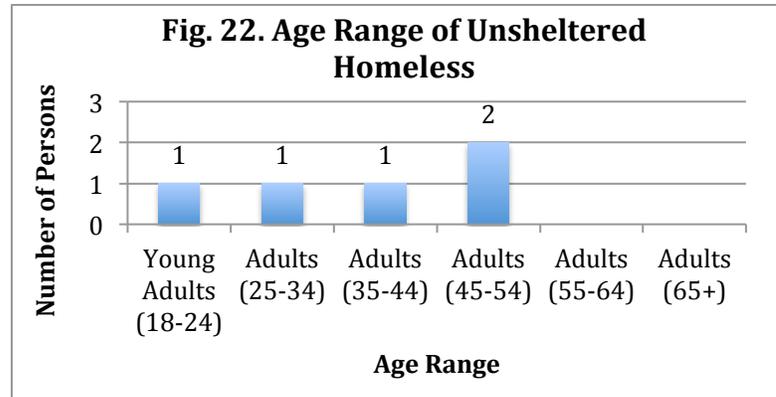

There were 0 families with adults and children identified as unsheltered on the night of the count.

All 4 of the households were adult-only households made up of 5 adult persons.

Demographics

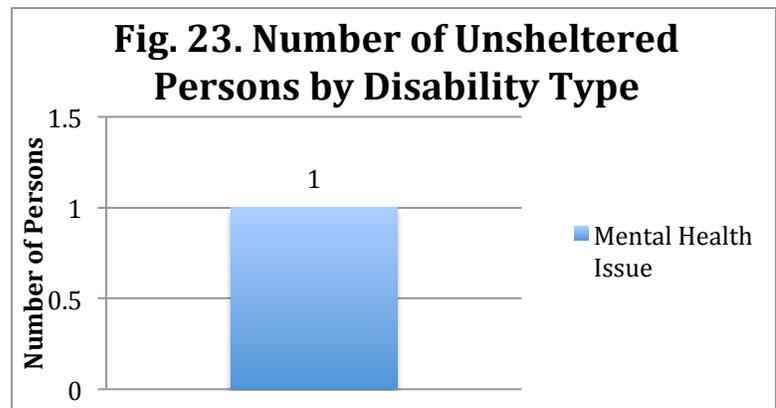

Of the 5 unsheltered persons counted, 1 (20%) was between 18 and 24 years old. (40%) of those living unsheltered were between the ages of 45 and 54.

4 of the 5 unsheltered persons were male (80%). 80% identified their race as White and 20% identified as Asian. None of the respondents identified as Hispanic.

Disabilities

Just 1, 20%, of unsheltered persons reported having some disability. The disability identified was a mental health issue.

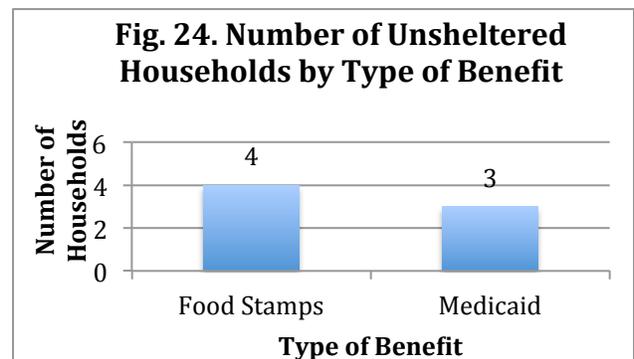

Subpopulations

On the night of the count, 0 of the unsheltered homeless persons in Gloucester County reported being victims of domestic violence.

There were 0 unsheltered veterans identified on the night of the count.

Income and Benefits

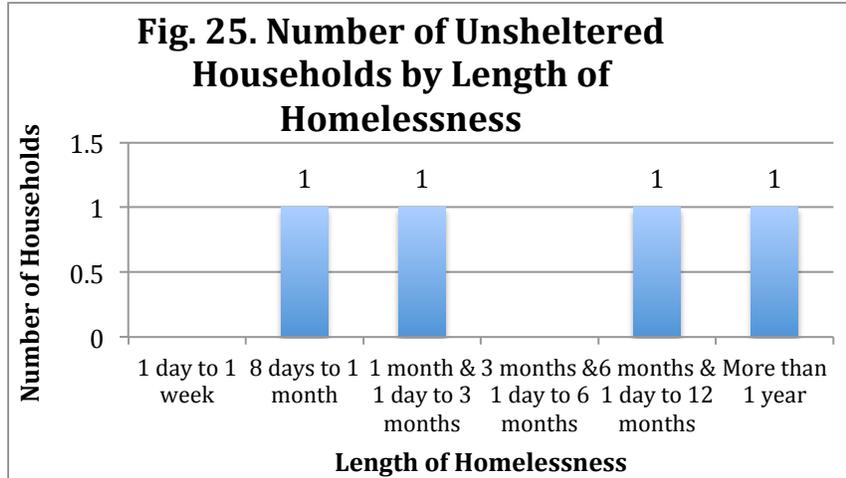

Among all the unsheltered households on the night of the count, 0 reported what source of cash income they may have, but the average monthly income among unsheltered households was approximately \$400.

0 unsheltered households reported that they were not receiving any type of non-cash benefit on the night of the count. Food Stamps (SNAP) was the top reported non-cash benefit among this population, with 100% receiving this benefit, while 75% were receiving Medicaid.

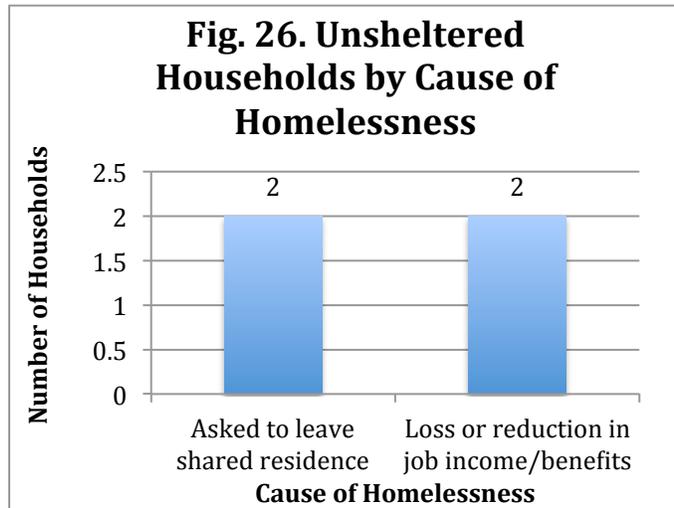

Length of Homelessness

As shown in Figure 25, 1 unsheltered homeless household (25%) reported that their most recent, continuous episode of homelessness had lasted more than 1 year. 2 (50%) reported they had been homeless fewer than 3 months.

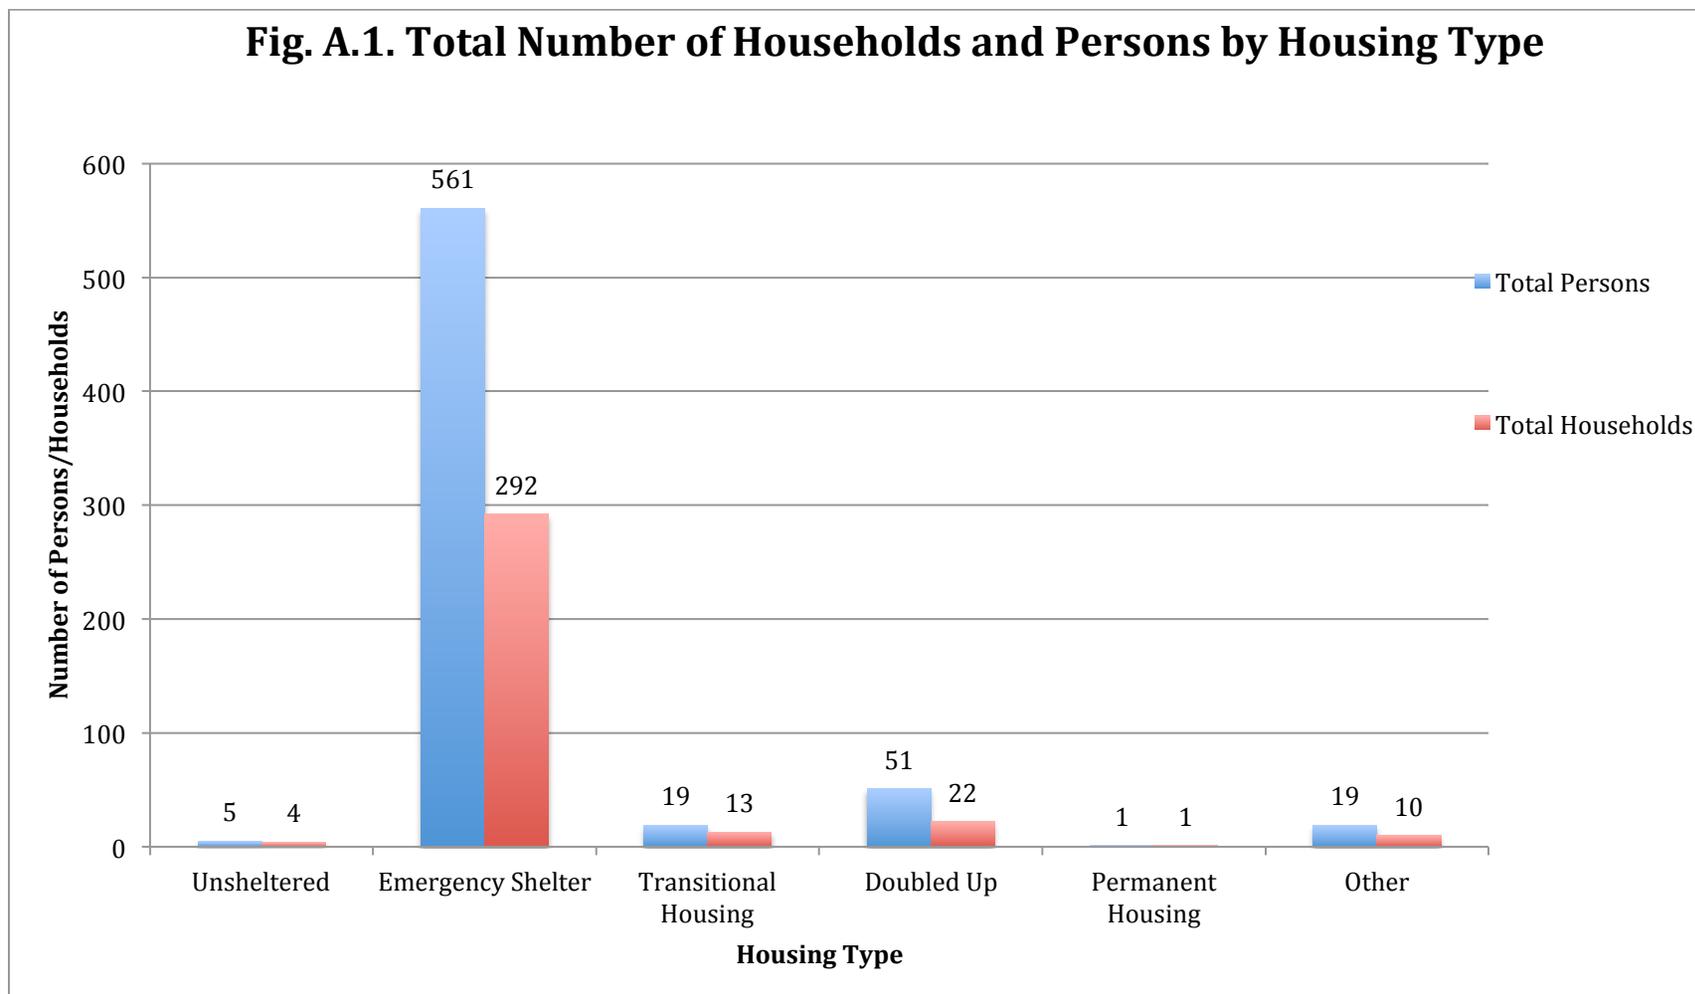

Cause of Homelessness

When asked to share the primary factor that contributed to, or caused, their homelessness, half of unsheltered households said loss or reduction of job income or benefits and half said being asked to leave a shared residence.

HUD's 2014 Continuum of Care Homeless Assistance Programs Housing Inventory Count Report

Important Notes About This Data: This report is based on information provided to HUD by Continuums of Care in the 2014 Continuum of Care application and has not been independently verified by HUD. CoCs were instructed to collect data for a point-in-time during the last week of January 2014. For inquiries about data reported by a specific Continuum of Care, please contact that jurisdiction directly. CoC contact information can be found on the HUD Exchange web site (<https://www.hudexchange.info/grantees/>). In some cases, a community may have listed a program in the Housing Inventory Count but did not provide sufficient information/detail for HUD to understand the number of beds/units available and the target population served. Those programs have been removed for the purposes of this report.

State: New Jersey

Summary of all beds reported, aggregated to the state level:

	Family Units ¹	Family Beds ¹	Adult-Only Beds	Child-Only Beds	Total Yr-Round Beds	Seasonal	Overflow / Voucher	Subset of Total Bed Inventory

*HUD's point-in-time count does not include persons or beds in Permanent Supportive Housing as currently homeless.

**Other Permanent Housing (OPH) - consists of PH - Housing with Services (no disability required for entry) and PH - Housing Only, as identified in the 2014 HMIS Data Standards.

¹Family Units and Family Beds categories include units and beds for households with one adult and at least one child under age 18.

²Chronic Beds include beds in Permanent Supportive Housing dedicated to serve chronically homeless persons.

³Veteran Beds and Youth Beds, respectively, include beds dedicated to serve homeless veterans and their families, and include beds dedicated to housing homeless youth age 24 and younger.

HUD's 2014 Continuum of Care Homeless Assistance Programs Housing Inventory Count Report

Important Notes About This Data: This report is based on information provided to HUD by Continuums of Care in the 2014 Continuum of Care application and has not been independently verified by HUD. CoCs were instructed to collect data for a point-in-time during the last week of January 2014. For inquiries about data reported by a specific Continuum of Care, please contact that jurisdiction directly. CoC contact information can be found on the HUD Exchange web site (<https://www.hudexchange.info/grantees/>). In some cases, a community may have listed a program in the Housing Inventory Count but did not provide sufficient information/detail for HUD to understand the number of beds/units available and the target population served. Those programs have been removed for the purposes of this report.

Grand Total	28	87	32	0	119	0	295	26	0	0

*HUD's point-in-time count does not include persons or beds in Permanent Supportive Housing as currently homeless.

**Other Permanent Housing (OPH) - consists of PH - Housing with Services (no disability required for entry) and PH - Housing Only, as identified in the 2014 HMIS Data Standards.

¹Family Units and Family Beds categories include units and beds for households with one adult and at least one child under age 18.

²Chronic Beds include beds in Permanent Supportive Housing dedicated to serve chronically homeless persons.

³Veteran Beds and Youth Beds, respectively, include beds dedicated to serve homeless veterans and their families, and include beds dedicated to housing homeless youth age 24 and younger.

PUBLIC HOUSING AUTHORITY SURVEY

FY 2015 – FY 2019 FIVE-YEAR CONSOLIDATED PLAN

PUBLIC HOUSING

- 1 Total number of public housing units owned and managed by your Authority: 262
- . Please provide a breakdown of units by public housing development, type of resident (elderly or family), bedroom configuration, occupancy rate, and unit turnovers. Attach additional sheets if necessary.

Example for breakdown format:

Development name	Municipality	# elderly units	# family units	# bedrooms					Current occupancy rate	Annual turnover of units
				0	1	2	3	4+		
CARINO PARK	MONROE TWP	100	0		100				99.99%	14
DEPTFORD PARK	DEPTFORD TWP	100	0		100				99.99%	10
SCATTERED SITES	GLO. COUNTY	0	62			6	46	10	99.99%	2

- 2 What is the date of the Authority's most recent Physical Needs Assessment (PNA) of its housing stock?
 . 01/20/2014 (year)
- 3 Based on the results of the PNA or other objective data, please summarize the overall condition and needs of the Authority's public housing stock. Attach additional sheets if necessary.

Development name	Overall condition of housing stock at this development: GOOD (new or recently renovated) FAIR (needs minor rehab or improvements) POOR (needs major rehab or demolition)	Strategy planned: NO ACTION NEEDED MINOR REHAB MAJOR REHAB PARTIAL DEMO FULL DEMO
204-1	FAIR	MINOR REHAB
204-3	FAIR	MINOR REHAB
204-4 (53 UNITS)	FAIR	MINOR REHAB
204-4 (47 UNITS)*	POOR	MAJOR REHAB
*water damage units due to burst pipe		

-
4. When did your Authority last update its Section 504 needs assessment and transition plan? 02/18/1992
- a. What is the status of the Authority's transition plan? COMPLETE
5. Of the total public housing units owned and managed by your Authority, how many units currently meet UFAS accessibility standards? 200
- a. Number of accessible units for persons with mobility disabilities? 55
- b. Number of accessible units for persons with sight and hearing disabilities? 90
6. Is the public housing waiting list currently open? Yes X No ___
- a. If no, when was your waiting list last opened and for how long? _____
7. Please list the top three public housing resident initiatives being carried out by your Authority:
- a. **CONGREGATE SERVICE PROGRAMS**
-
- b. **FSS**
-
- c. **ROSS**
-

8. If you have received or plan to apply for any federal funds in funds in FY 2015, please describe briefly what activities will be undertaken with these funds and at which public housing communities.

**CAPITAL FUND AND OPERATING FUND. WILL BE USED TO OPERATE AND PERFORM
CAPITAL IMPROVEMENTS AT NJ204-1, NJ204-3 AND NJ 204-4**

9. Describe actions to be undertaken in FY 2015 by your Authority to improve the management and operations of public housing and the living environment of public housing residents. If no actions are proposed, clearly so state.

**NO INITIATIVES WERE STARTED DUE TO GREATLY REDUCED FUNDING LEVELS FOR THE
CAPITAL AND OPERATING FUNDS**

10. During the FY 2015-2019, does the Authority expect to lose any public housing units through:
- a. Conversion to private market housing? Yes___ No X If yes, how many units? _____
- b. Demolition? Yes___ No X If yes, how many units? _____
- c. Conversion or modernization involving increases or decreases in the existing number of units? Yes___ No X If yes, how many units? _____
- d. Disposition? Yes___ No X If yes, how many units? _____
- e. Other (Specify: _____) Yes___ No ___ If yes, how many units? _____

11. Please complete the "Priority Public Housing Needs" table below.

EXPLANATION OF TABLE:

High Priority Need Level: Category **will** be funded.

Medium Priority Need Level: Category **may** be funded.

Low Priority Need Level: Category **very unlikely** to be funded.

PRIORITY PUBLIC HOUSING TABLE

Public Housing Need Category	PHA Priority Need Level High, Medium, Low, No Such Need	Estimated Dollars To Address Category
Restoration and Revitalization		
Capital Improvements	PAVING (LOW)	\$250,000
Modernization	DOORS, LOCKS, MECH (LOW)	\$300,000
Rehabilitation	GENERAL UPGRADING (LOW)	\$500,000

Other (Specify)		
Economic Opportunity	RESIDENT ECONOMIC OPPORTUNITY CENTER	\$ 20,000 ANNUALLY
Resident Services/ Family Self Sufficiency		
Homeownership		
Other (Specify)		
Total		\$1,070,000

RESIDENT INITIATIVES

12. Does each public housing community have a resident council? Yes ___ No **X** If no, please list projects that have resident councils:

NJ 204-3 AND NJ 204-4

13. Do resident councils have input/involvement in:

a. Management operations? Yes **X** No ___

b. Modernization needs? Yes **X** No ___

c. Family self-sufficiency program? Yes___ No X

d. Homeownership program? Yes___ No X

For each “yes” response, please indicate the nature of the resident council’s involvement.

**WE MEET WITH THE ELDERLY RESIDENTS QUARTERLY, AT THEIR BUILDINGS. THEY
ARE ENCOURAGED TO MAKE SUGGESTIONS. BOTH ORGANIZATIONS ARE CONSULTED
ANNUALLY CONCERNING RESIDENT ADVISORY BOARD**

14. Describe activities to be undertaken in FY 2015 by your Authority to increase the involvement of PHA residents in management. If no such activities are proposed, clearly so state.

NO ACTIVITIES ARE PROPOSED

15. Does the Authority operate a public housing homeownership program? Yes___ No X

If yes, how many homeownership transactions have been completed to date? _____
